STRUCTURAL SAFETY FACTOR

E-ONE's Bronto RLP & RLP+ are the most versatile aerial platforms on the market. The articulating boom offers unmatched performance and diversity for above and belowgrade accuracy of platform placement with a history of articulated platform design that is second to none.

REV GROUP

BELOW-GRADE CAPABILITIES

ABOVE-GRADE PERFORMANCE

The Bronto® RLP, designed in conjunction with and offered exclusively by E-ONE, is one of the most proven, versatile aerial platforms on the market. With more than 250 units delivered in North America and more than 6700 units delivered to 120 countries worldwide, this articulating platform offers an unmatched history of performance for above, up-and-over, and below-grade rescue capabilities.

The E-ONE Bronto product offering includes the RLP 100, 114, 134, and RLP+ 116 series articulating aerial platforms. Bronto's "RLP+" denotes models with a state-of-the-art control system which offers advanced color displays to enhance operator capabilities and features technology to automatically adjust the operating envelope based on the placement of the jacks.

Offered on one of the industry's strongest custom cabs, the E-ONE Cyclone, allows the articulating platform to not only meet, but exceed industry cab crashworthiness standards.

Whether it's the 100', 114', or 134' RLP configuration or the 116' RLP+ configuration, we invite you to experience the pin-point placement capabilities of the E-ONE Bronto.

CUSTOM CHASSIS

- Quest® or Cyclone® II chassis
- Medium length 4-door cabs
- 230" wheelbase with 45 degree cramp angle
- 500-600 HP Engine
- Standard safety features such as roll cage cab, CrewGuard, ABS brakes & G4 (electronic stability control)
- Optional airbags and OnGuard® collision avoidance system

BODY CONSTRUCTION

- Extruded aluminum with up to 148 cu.ft. storage (short hosebed)
- Rear enclosed storage for up to 115' of ground ladders
- Available with Sidestacker® body or "truck company" style with no tank or pump

FIRE PACKAGE

- 2000 GPM pump
- 300 gallon water tank
- Stainless steel discharge manifold
- Optional foam systems; direct injection, and around the pump (ATP)
- Customizable discharges and preconnects to meet departments needs

ELECTRICAL

- Multiplex electrical system with color display provides increased feature capability and improved diagnostics
- Federal Signal® or Whelen® optical and audible warning packages
- Options include LED scene lights, advanced camera systems, and 6-15 kW hydraulic generators

RLP SERIES

With a rich history in North America as the exclusive supplier of articulated platforms for many years, the RLP series is the workhorse of the Bronto product line-up with a reputation of unique fire and rescue capabilities. The RLP series features the following:

- Vertical heights of 100', 114' and 134'
- Easy, quick jack set-up
- Full auto leveling
- Easy to operate controls
- Short jacking standard

RLP +

Designed for departments wanting the most technologically advanced articulated platform in the industry, the Bronto RLP+ offers the tried-and-true mechanics of the RLP with enhanced control system and displays. The RLP+ offers features such as:

- Vertical height of 116'
- Full auto leveling for quick jack set-up
- Three color displays with essential diagnostic and operational information on all screens
- All critical information is available on the display including outreach diagram and real-time position of the working platform and main boom angle
- Envelop control displays maximum possible outreach to all directions based on jack placement and basket load
- Outriggers can be positioned freely according to the working situation
- Ground pressure alarm
- Cradle assist for easy bedding of the aerial device
